ABOUT

Christian Unions are students based evangelical groups, majorly referring to Christian student's society. Despite being large denominational groups, Most University and College Christian Unions activities are run manually. This has brought about to rise of management problems nearly tearing them apart. Some of identified problems are but not limited to: Manual registration of new Union members, Keeping of the membership records which are kept in physical cabinets, Recording and handling of ministries data and information, Keeping different groups data e.g. bible study and BEST-P groups, Manual accounting, recording and tracking of Union assets and resources e.g. Union owned furniture's and public address systems, recording and tracking events data, Union library resources management, Keeping records of union contributions, tithing and offerings and accounting of the union cash flow, registering and keeping data of associates, The union leaders, preachers and their sermons among other un identified problems.

The proposed Christian Unions Management Information System is a web based data and information recording, analyzing, tracking and accounting tool aiming at solving the above named problems among others. In addition to having many integrated features, the system is customizable to meet new requirements, adapt to evolving technologies, portable and accessible anywhere.

The proposed system is composed of a management information system, student portal and a website fully synchronized for data sharing and communication.

The system also has an automated report generation feature which delivers ready to print pdf form reports.

The main features of the system are described below.

1) MAIN DASHBOARD

As shown below, this is the main part of the system. The dashboard provides easy navigation to the system modules, and count of items under each module. For instance in the below use case, the system shows that the total number of registered members is 10.

To navigate to any module or part of the system, you just have to click the item link.

2) MEMBERS MODULE.

The members' part displays the union member's information like names, contacts, course and year of study among others. Provided also is a new member registration form for adding a new member. Also members can register themselves through their union portal.

Through the members interface you can also delete or edit a member record, filter members by their courses, year of study or gender.

4) GROUPS MODULE

Same to the ministry module, group part shows different groups information including, current leader, meeting days, venue and contacts of the current overall leader. Also provided is a interfaces for adding a new group, deleting or editing a group information and viewing group members.

For instance above records or two groups' i.e. bible study and BEST-P are shown.

5) LEADERS BOARD

This module shown records of the Union leaders and additional features for editing, deleting and adding a new leader
