Created by designer David Baszucki and programmer Erik Cassel in the spring of 2005, Roblox Corp. is a company based in San Mateo, California, created to “[make] the world’s games and experiences come to life on the web.” Founded with a simple mission of being the best place on the web to build and play games, Roblox soon surpassed that goal by offering developers a venue for more immersive experiences. Users are able to create their own games or customize existing games with features that can include life-like physics, multiple devices or windows, and rich social features. The company’s first game was BloxZoid (released in May of 2006), a robot-based game in which players take on the role of the titular robotic creature. Other games developed for the platform include Mystic Legends, ShadowRise, and Snuggle Truck, the latter two of which were also released for iOS. In 2008, the company added an enhanced 2.5D game engine that allowed for smoother gameplay, and then in 2009 Roblox’s first MMO game, Noodle Hockey, was released for iOS and Android. Released in the fall of 2011, Wonderland: A Maze of Magic and Mayhem challenged players to escape from the whimsical kingdom of Wonderland while trying to avoid the resident warlocks. In 2013, Roblox introduced a game development API that enabled developers to create their own games to be played in the Roblox environment. With the Android application programming interface (API), users could create their own games in the Roblox platform and then have those games playable on the platform itself or on other Android-compatible devices. A similar companion app, the Roblox Desktop Application, was released for Windows PCs in 2013. A number of video games have been released for Roblox in the years since, including Atlantis: The Lost Empire, Knuckle Wars, Marble Blast Ultra, Medici 2: Gold Edition, and World of Tanks Blitz. In 2014, Roblox acquired TinyCo, a San Francisco-based game studio, that specialized in making user-made games for mobile devices and social networking sites. In September 2015, the platform introduced Bloxels, a physics puzzle game that allows users to create their own three-dimensional shapes. Roblox has also partnered with other platforms, including the TPCast Network, Samsung Gear, Disney’s YouTube, and Freebird Games. More recently, the company has explored
