

Plastic mold company in china: custom mold/molding service, all in one service

Welcome to Plas.co (Sincere Tech), a leading plastic mold company in China that offers a wide range of services including custom mold making, injection molded parts, part design, prototyping, testing, die casting, machining, silicone molding parts, assembly, and more.

At Plas.co plastic mold company, we pride ourselves on our commitment to quality, innovation, and customer satisfaction. Our experienced team of engineers and technicians uses the latest technology and techniques to ensure that every project we undertake meets or exceeds our customers' expectations. We specialize in the design and production of high-quality custom plastic injection molds, die-casting molds, and silicone molding parts, as well as assembly service. Our team of experts can help you with every step of the process, from design, prototyping, testing, re-prototyping, PCB assembly, cable welding, inspection to final production and delivery.

Our plastic mold company services include:

- **Mold Making:** We offer a comprehensive range of custom plastic mold making services, including injection molding, die-casting molds, and silicone molding. We can create custom molds to meet your exact specifications, using the latest technology and techniques to ensure that your project is completed to the highest standards.
- **Molded Parts:** We specialize in the production of high-quality customized molded plastic parts for a wide range of industries. Our experienced team of technicians and engineers can help you with every step of the process, from design and prototyping to final production and delivery.
- **Die Casting:** We offer a full range of customized die casting services, including die casting mold design, die casting production, and finishing. We use the latest technology and techniques to ensure that your project is completed to the highest standards, and we are committed to providing our customers with the best possible service and quality.
- **Machining:** Our state-of-the-art machining capabilities allow us to produce precision parts and components for a wide range of industries. We use the latest technology and techniques to ensure that every project we undertake is completed to the highest standards, and we are committed to providing our customers with the best possible service and quality.
- **Silicone Molding Parts:** We specialize in the production of high-quality silicone molding parts for a wide range of industries. Our experienced team of technicians and engineers can help you with every step of the process, from design and prototyping to final production and delivery.

In addition to our manufacturing services of custom mold making, molded parts, die casting, machining, and silicone molding parts, our company also offer product development and final assembly services.

Our experienced team of designs and technicians can help you take your product from concept to final production. We use the latest technology and techniques to ensure that your product is designed and manufactured to the highest standards, and we work closely with our customers throughout the process to ensure that their needs are met or exceeded.

Our product development services include:

- Concept Design: We can help you turn your ideas into a reality by providing concept design services that take into account your specific needs and requirements.
- Prototyping: Our prototyping services allow you to test your product before it goes into production, helping to identify any potential issues and ensuring that your product meets your exact specifications.
- Tooling: We can provide custom tooling solutions to help you manufacture your product at scale, ensuring that your product is manufactured to the highest standards.
- Manufacturing: Our manufacturing services include injection molding, die casting, machining, and silicone molding parts, ensuring that we can provide you with a complete manufacturing solution.

Our final assembly services include:

- Component Assembly: We can assemble individual components to create a finished product, ensuring that all parts fit together perfectly and that the finished product meets your specifications.
- Testing: We can test your finished product to ensure that it meets your requirements and is stable for use.

- Certificate: We can make certificate for your electronic products, such as CE, ETL, FCC, etc.
- Packaging: We can package your finished product according to your specifications, ensuring that it arrives at its destination safely and securely.
