# Learn Everything About The Joinpd.com Join

Pear Deck enables educators to design interesting presentations, and students can take part in engaging activities. A link or 5-digit code is provided by **joinpd.com join** that enables you to enroll as a student in a Pear deck session. Everything you need to know about joining Peardeck will be covered in this tutorial.

Students can take part in interactive presentations made and shared by their teachers by using a code or link on **joinpd.com join**, a sub-domain or microsite on PearDeck.com. Teachers can provide students the code or link by text or email. There are no other places to get it.

For access to the presentation, students do not need to register with Pear Deck. Students will need to just have a Microsoft or Google account to complete this. Google Slides and Pear Deck are connected. Additionally, through their teachers, students can join anonymously.

## What is JoinPD?

Users can quickly and simply create presentations with Pear Deck, an online presentation platform. It has several uses and may be applied to different types of institutions and classes, including education, the workplace, and marketing. Discussions on the Pear Deck are beneficial, useful, and interesting. You can use it to respond to inquiries and listen to others in real time.

Using Your **joinpd.com join** code, a program like JoinPD can be used to connect to a presentation that is already happening. Pear Deck, which powers JoinPD, enables professors and students to complete online courses.

The teacher must make a presentation as soon as they log into their JoinPD account.
Then, they must send an email including the Peardeck code to every student or anyone wishing to register at their specific locations.

Students are involved in their social and personal learning through the usage of the presentation tool Pear Deck. Teachers create presentations using the presentation tools available on their Google Drive accounts. Pear Deck promotes a sense of community among students in order to build a pleasant mental attitude among them. Keep reading to learn more about **joinpd.com join**.

## How to Create a JoinPD Join Code?

You must first log into Peardeck in order to create a **joinpd.com join** code; once you have done so, browse to the presentation area to create an invite code. Only when you share the join code with students may they enroll in your class. If the teacher has activated the appropriate setting, students will require a Google or Microsoft account to attend the presentation. If not, you can sign up without a username or an avatar.

- To generate a **joinpd.com join** code, go to Peardeck.com.
- Create an account if you don't have one already.
- Simply select Create Presentation.
- Click "Add-ons" in the browser's menu at the top.
- There will be a menu for add-ons. Press Get Add-ons.
- Check out the results by typing "pear deck" into the search box.
- Click the download free button to install Pear Deck.
- After that, click Add-ons once more.
- Open pear one by clicking on it.
- The provided template options can be used to create a presentation, which you can then use as necessary.
- Click "Present with Pear Deck" when your presentation is ready.
- After you click, the website will generate a 5-digit **joinpd.com join** code that you can share with others who want to view the presentation.

## End Note

Teachers and students can generate **joinpd.com join** code using a fantastic portal called JoinPD. It can help you improve your teaching and learning while saving you a lot of time. Since Pear Deck is a freemium service, it is available with restricted features and tools.
