

# WIRES & CABLES

With extensive research and development along with the finest conclusions Microtek has developed the best in class products and are addressing the continuously changing requirements of our treasured customers. The growth in the flexible cables category has been brought about by bringing new and improved things to the interest of our customers. If there is something that is required everywhere irrespective of the genre of work being done, it is undoubtedly flexible cables. Whatever the type of construction, industrial work, or domestic installation is being done, cables are always an integral part.

### Lead Free Flame Retardant Wires

LFFR wires are made of no-chemical Lead Free PVC insulation that ensures that they are safe for the environment. Its flame retardant property elevates the oxygen index which prevents the fire from spreading. They are used for internal electrification and power supply to all electrically connected equipment.

## Fire Retardant Low Smoke & Halogen Wires

Microtek FRLS-H (Fire Retardant Low Smoke & Halogen Wires) has been designed for commercial buildings and especially for buildings where it exists and ventilation is limited. Microtek FRLS-H (Fire Retardant Low Smoke & Halogen Wires) flexible cables are manufactured from specially formulated insulation that reduces toxic gases and smoke for human safety.

For internal electrification in commercial buildings with restricted ventilation

- High oxygen Index
- Self-Extinguishing Property

## Zero Halogen Low Smoke Wires

Microtek ZHLS (Zero Halogen Low Smoke) wires a breakthrough from R&D efforts of Microtek engineers at Parwanoo plant, the Special compound is practically halogen-free and has a very high oxygen index. ZHLS (Zero Halogen Low Smoke) wires are NON-TOXIC & Environment Friendly.

For internal electrification and power supply to all electrically connected equipment

- Non-Toxic
- Environment-Friendly

## Multi Core Round PVC Flexible Cables

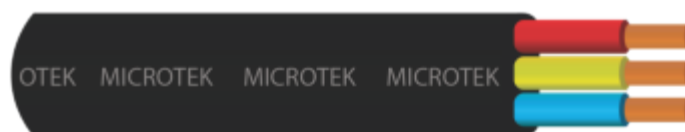

**Microtek Multi Core Round PVC Flexible Cables** provide the highest level of electrical conductivity at 101% copper conductivity, exceeding the parameter indicated by the international annealed copper standard (IACS). Microtek flexible cables are energy efficient, Low voltage drop, short circuit protection, Higher DI-Electic Strength, High conversion of heat, waterproof & UV resistant.

For internal & external electrification and power supply for a wide range of industrial and domestic applications.

## Three Core Flat PVC Submersible Cables

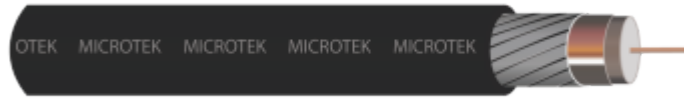

Microtek Submersible Cables is a specialized products to be used for submersible pumps in a deep well. Microtek three core submersible flat cables are designed for use in underground, under-water or on a wet surface. Microtek Submersible Cables is good for insulation properties when submerged in water & excellent mechanical & electrical properties

For electrification and power supply in underground, under-water or on a wet surface

- Highly Abrasion Resistant
- Excellent Insulation Properties

## Co-Axial TV Cables

Microtek Co-Axial TV Cables used in TV Operation, Computer networking etc. Microtek Co-Axial TV Cables Solid annealed bare copper conductor polyethylene insulated shielded with polyester backed aluminium tape and additional shielding with fine aluminium braid prated with polyester tape wrapping and sheathed with PVC.

For internal & external electrification and power supply in cable TV operations, Computer networking etc.

## Telephone Switch Board Cables

Microtek Telephone Switch Board Cables used for indoor telephones, telephone exchange, industrial Plant Communication Systems. EPBAX Systems, Closed Circuits security Systems, In-House telephone wiring and various other equipments involving telephones.

For internal & external electrification and power supply in all equipments involving telephones.

## Speaker Cables

Microtek Speaker Cables are used to make connections between loudspeaker and audio amplifiers within various sound instrument. In today's constructions, the new building code (like for Airpots, Railway Plate from, auditorium, Offices, High-rise apartment and hospitals etc.) installation of speaker cables ensure and distraction free voice with very low dB loss.

For connecting loudspeaker and audio amplifiers within various sound instruments

## LAN Cables

Microtek LAN Cables Complete Networking Solution allows to access High-Speed network / Internet data. The cables are verified to the performance requirement of ISO/IEC 11801, TIA/EIA 568C.2. Unshielded twisted pair (UTC) cable is used in many homes and business-based Ethernet network. Each pair is twisted to prevent interference from other devices on the network.

For networking and accessing high-speed networks and internet data

## CCTV Camera Cables

Microtek CCTV Cables are designed to optimize the quality of video signals, which are transmitted through the coaxial cable in the CCTV. Coaxial cable consists of a solid annealed copper conductor of electrolytic grade, which is insulated with foamed dielectric, aluminum foil taped, jelly flooded, braided with Al. Alloy and the jacketed with PVC.

For transmitting complete video frequency range with minimum distortion or attenuation

## Solar Cable

Solar cables are intended for use in photovoltaic power supply system and similar application as free hanging, movable, fixed installation and buried in the ground in the constructional covered system.

These cables can be used in indoor, outdoor, and explosive areas in industry and agriculture. They are suitable for application equipped with protective insulation.
