

How to Apply for ISO Certification?

ISO Certification is one of the most powerful ways to build trust, improve your operations, and show the world that your business follows globally recognised standards. Whether you run a small company or a large enterprise, you need an ISO Certification, but the question is, how does the organisation [apply for ISO Certification](#)?

With SQC Certification, the organisation can understand the main steps of applying ISO Certification. They provide practical advice on which ISO Standards are best for your organisation.

Why ISO Certification Matters?

ISO certification matters because it gives organisations a globally recognised way to prove that they operate with quality, safety, efficiency, and trust.

Here are the key reasons why it matters

- **Build trust** -With ISO Certification, the organisation can build their trust because customers feel more secure when they know a company follows international standards.
- **Improves Internal Processes** - ISO standards give a structured way of working. They help organisations to reduce errors, waste and enhance overall performance.
- **Supports Global Expansion** - ISO is recognised worldwide. Certification opens doors to international markets by proving that your business meets global

expectations, which helps you to interact with international customers and partners.

- **Reduces Risk and Improves Safety** – With ISO standards, the organisation can identify the risk and protect the business.

Process of Getting ISO Certification

Getting ISO Certification may seem complex, but with the guidance from an experienced certification body, the entire process becomes clear, structured, and manageable.

Client Submit Application for Initial Certification – Firstly, the client submits their business information and the ISO Standard they want for their organisation.

Review of the requirement – After applying, the certification body reviews the application and makes sure the organisation is eligible for the process. Based on that information, they provide a quotation and an audit plan.

Conducting Audits – The audit is typically conducted in two stages, which are

- **Stage 1** – It is a documentation review where the auditor reviews the documents, procedures and policies that align with the ISO Standards.
- **Stage 2** – This is the main audit where the auditors visit the organisation's premises, observe processes in action and verify compliance with the standard.

Review the area of concern – If there are any Non-conformities (NCs) found, the organisation must be addressed before certification is granted.

Audit Report and Decision – Based on your audit reports, the certification body decides whether the organisation qualifies for ISO certification or not.

Issuance of Certificate – If the organisation meets all ISO requirements and has corrected the non-conformities, then the certification body issues the official ISO certificate.

Cost of ISO Certification

The **cost of ISO Certification** depends on several key factors.

- The type of ISO Standard you choose for your organisation
- Size of the Organisation

- Location
- Chosen Certification body
