

PUF Pipe Insulation Supports

Engineering Excellence in Thermal Protection and Structural Support

 VIVAN INSULATIONS

Made with **GAMMA**

What Are PUF Pipe Insulation Supports?

Premium Material

Manufactured from high-quality rigid polyurethane foam (PUF) specifically engineered for pipe support and thermal insulation applications

Dual Functionality

Designed to deliver exceptional thermal resistance whilst providing robust mechanical strength and maintaining uniform thickness throughout

Versatile Configurations

Available in multiple shapes including round, square, and degree supports ranging from 60° to 120° to suit varied installation requirements

Industry Applications

Ideal for demanding sectors such as oil & gas, pharmaceuticals, food processing, and chemical manufacturing facilities

Key Features & Technical Advantages

01

Superior Density Range

Available from 100 to 500 kg/m³, ensuring outstanding compressive strength and long-term durability under load

02

Customisable Thickness

Starting from 25mm and upwards, fully customisable to meet specific project requirements and thermal performance targets

03

Flawless Construction

Precision-engineered with sturdy design to prevent pipe deformation and insulation crushing during operation

04

Thermal Protection

Superior insulation properties reduce heat loss, prevent condensation, and protect pipes from corrosion under insulation (CUI)

Why Choose PUF Supports Over Alternatives?

Superior Performance

Compared to traditional fibreglass H-Blocks, PUF delivers better uniformity, higher compressive strength, and consistent quality throughout the product lifecycle

Installation Efficiency

Lightweight design enables easy handling and installation, significantly reducing labour requirements and on-site installation time

Enhanced Durability

Excellent resistance to moisture ingress and chemical exposure extends pipe system lifespan and reduces maintenance costs

Energy Compliance

Supports thermal efficiency objectives critical for energy savings and meeting regulatory compliance standards across India's industrial sectors

Partner with Vivan Insulations for Reliable Pipe Support Solutions

Custom Manufacturing

Bespoke sizes and shapes manufactured precisely to your specifications and project requirements

Competitive Pricing

Cost-effective solutions with prompt delivery timelines to keep your projects on schedule

Expert Guidance

Backed by experienced technical support team for optimal insulation system design and implementation

Enhance your pipeline performance and longevity with India's trusted PUF insulation partner
